Dear Colleagues!

On the 23-24 of March 2011 in Moscow the Association of Automobile Engineers (AAE) together with Technical University MADI organizes The 73rd International Scientific and Technical Conference «Automobile in the Intelligent Transportation System (ITS)», devoted to the 80th anniversary of MADI.

The purpose of the conference is to determine the prospects of on-board "smart" automobile system on the Russian market, including devices for the exchange of information between the vehicle and the infrastructure ITS created in Russia based on the analysis of international experience and data exchange.

It is supposed to discuss technical, organizational, legal issues of application of onboard systems:

- Information for the driver and passengers;

- Gathering and transmission of information for ITS infrastructure (including the framework of ITS ERA Glonass)

- Automatic control of the automobile.

Except AAI members representatives of the Ministry of Transport Russian Federation, Federal Highways Agency, ITS Russia, the creators of the ERA-Glonass, the developers of navigation-connected automotive equipment will be invited to the conference.

Kindly we would appreciate the participation of Your representatives and making presentation at the conference.

For participation in the conference contact the organizing committee ONTI (Boris S. Subbotin tel. (499) 155-01-23, e-mail: onti@nich.madi.ru)
or ITS Russia: Vladimir Kruchkov,
tel: + 7 495 543 1346, e-mail: vladimir.kruchkov@ingos.ru

Vice-rector, MADI
Dr. Sc., prof   Andrey Ivanov
