VectoGeo

MAIN FEATURES

- **EASY INTEGRATION**
  The integration of the MapServer Vettoriale on web and mobile is simplified, thanks to tools like widget and SDK

- **REPRESENTATION IN HIGH QUALITY**
  Due to the quality of vectorial representation, it can achieve various resolutions (full HD, Ultra HD, etc ...), offering top results constantly

- **SPEED**
  Data compression boasts a data transfer rate and representation, which are superior compared to traditional MapServers

- **OPEN CARTOGRAPHY**
  VectoGeo is based on Open cartography, securing:

  - constant data update process
  - use of free license
  - worldwide geographic coverage
