### Five new organizations join TTS Italia

Five new organizations have joined the Italian ITS society, TTS Italia. The new members are: ACAM, the mobility agency of the Campania Region in southern Italy, which is a support agency to the regional administration in the development of plans, programs, contracts, procedures for the regulation and control of mobility services, mobility systems planning, development and management information systems; Cediss, a company specializing in systems for safety and security on public transports, with a focus on systems for fleet management, surveillance and infotainment; ESRI Italia, a society for services and systems based on GIS (Geographic Information Systems) technologies, which is particularly active in local and central public administration through systems for urban/land planning, for the environment and for emergencies management; ISIS (Istituto di Studi per l'Integrazione di Sistemi), an Italian private research and consultancy firm, which supports public and private policy makers in the formulation, monitoring and evaluation of energy, transport and environmental policies and decisions; and the Viasat Group, which operates in Italy in the security and satellite navigation industries, as well as production and assembly of cards and electronic products and in the development and production of electronic systems and computer platforms.
